APPLIED MATHEMATICS AND COMPUTATION

VOLUME 78

LU XIGUAN, LI YONG, AND SU YI
Finding Periodic Solutions of Ordinary Differential Equations via Homotopy Method 1

E. N. CHUKWU
Universal Laws for the Control of Global Economic Growth with Nonlinear Hereditary Dynamics 19

YONGZHONG SONG
Chaotic Waveform Relaxation Methods for Dynamical Systems 83

SPECIAL ISSUE ON DYNAMICS AND CONTROL

F. E. UDWADIA, E. HOFER, AND G. LEITMANN
Introduction to the Special Issue on Dynamics and Control 101

F. L. CHERNOUSKO
Control of Elastic Systems by Bounded Distributed Forces 103

JAROSLAV DOLEŽAL AND JIŘÍ FIDLER
Numerical Solution of Dynamic Optimization Problems Using Parametrization and OptiA Software 111

RAMESH S. GUTTALU AND HENRYK FLASHNER
Stability Study of a Periodic System by a Period-to-Period Mapping .. 123

VALERII I. HEYMANN AND ARKADII V. KRYAZHIMSKII
On Finite-Dimensional Parametrizations of Attainability Sets 137

TOMÁŠ HRABA AND JAROSLAV DOLEŽAL
Use of a Mathematical Model for Effectivity Estimation of HIV Infection Therapies 153

CINTHIA ITIKI, ROBERT KALABA, AND FIRDAUS UDWADIA
Inequality Constraints in the Process of Jumping 163

(Continued)

EDWIN KREUZER AND FERNANDO C. PINTO
Controlling the Position of a Remotely Operated Underwater Vehicle 175

STEFAN MAIER, MARIO E. MAGAÑA, RONALD R. MOHLER, AND STEPHEN KAATTARI
Modified Limiting Dilution Assay for Cell Systems 187

RONALD R. MOHLER, RADOSŁAW R. ZAKRZEWSKI, AND RAJKUMAR VEDAM
Nonlinear Control Algorithms and Power System Application 197

A. PERVOZVANSKI
On Some Algorithms of Learning Control 209

I. PITANGUY, F. LETA, D. PAMPLONA, AND H. I. WEBER
Defining and Measuring Aging Parameters 217

E. P. RYAN
A Universal Servomechanism for a Class of Nonlinear Planar Systems 229

E. REITHMEIER AND G. LEITMANN
Robust Constrained Control for Vibration Suppression of Mismatched Systems 245

B. TIBKEN AND E. P. HOFER
Interval Analysis as a Tool for Sensitivity Analysis of a Hemopoietic Model 259

A. STEINDL AND H. TROGER
Heteroclinic Cycles in the Three-Dimensional Postbifurcation Motion of O(2)-Symmetric Fluid Conveying Tubes 269

H. UNBEHAUEN
Some New Trends in Identification and Modeling of Nonlinear Dynamical Systems 279

VOLUME CONTENTS
